# INTERNATIONAL SEARCH REPORT

International Application No.

PCT/JP03/08654

## Box I Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☒ Claims Nos.: 44  
because they relate to subject matter not required to be searched by this Authority, namely:  
Claim 44 pertains to a method for treatment of the human body by therapy.
2. ☒ Claims Nos.: 1-32, 34-43, and 45-49  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:  
(See extra sheet)
3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box II Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest ☐ The additional search fees were accompanied by the applicant's protest.  
☐ No protest accompanied the payment of additional search fees.

Continuation of A. CLASSIFICATION OF SUBJECT MATTER  
(International Patent Classification (IPC))

Int.Cl<sup>7</sup> 37/06, 37/08, 43/00, 17/00, C07D401/12, 403/12, 405/12, 409/12,  
413/12, 417/12, A61K31/55

(According to International Patent Classification (IPC) or to both national  
classification and IPC)

Continuation of Box No. I-2 of continuation of first sheet(1)

The subject matters of claims 1-32, 34-43, and 45-49 are a compound represented by the general formula (I), a medicinal composition containing the compound as an active ingredient, etc. However, the compound involves an extremely wide range of various compounds. It is hence difficult to make a complete search for all of them. On the other hand, the compounds which are supported by the description in the meaning of Article 6 of the PCT and are disclosed in the description in the meaning of Article 5 of the PCT are limited to an extremely small part of the compounds.

Consequently, claims 1-32, 34-43, and 45-49 and the description do not comply with the given requirements to such a degree that a meaningful international search can be made.

The term "prodrug" used in the claims is unclear as to what structure is implied, even when the statements in the description are investigated. This term hence makes the scope of the compounds and medicines of the invention unclear.

In this international search report, a search with respect to claims 1-32, 34-43, and 45-49 was hence made for the compounds specified in the description through prior art documents within the range of a reasonable burden.
